RI TRANSPARENCY REPORT

2019

PREVI - Caixa de Previdência dos Funcionários do Banco do Brasil

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

PREVI prioritizes the selection and hiring of external managers that consider responsible investment in their assets under management, including fiduciary duties into their obligations. Thus, through its investment policy, PREVI must monitor the hired manager's work practices. If the initial agreement wouldn't be comply with the responsible investment, PREVI should change the external manager.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

In the management of assets and in the conduct of new businesses might be observed the following aspects and limits : ESG - Privileging investments that stand out for the adoption of the best practices of corporate governance and for actions of socio-environmental and ethical responsibility, in accordance with the PRI and with the Previ Code of Corporate Governance Practices;

PREVI accepts the idea that the adoption of socio-environmental responsibility practices may imply the rejection of seemingly profitable opportunities when they represent a risk to the environment (social, natural and economic) in which it operates. Long-term sustainable results and gains in maintaining a healthy environment outweigh the eventual refusal of apparent opportunities;

In internal investment decision-making processes, consider sustainability issues in the design, implementation, and strengthening of your management practices in order to:

- A) Include socio-environmental aspects in the analysis and selection of investments, highlighting the introduction of variables that consider the general principles of ESG issues;
- B) Promote the development of technical staff to be better qualified for ESG analysis;
- C) To promote the development and research for the improvement of the technical staff in Sustainable investment issues;
- D) Apply and promote the principles of best corporate governance.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

The investment assumptions are defined in the investment policy of pension fund benefit plans. Currently, Previ invests only in public securities of the Brazilian Federal Government, in the scope of SSA.

Financial Corporate, in addition to the investment policy, respects the allocation limits defined by the Risk area of Previ.

All investments proposed in Fixed Income in non-financial and Securitized companies, addition to the Investment Policy, are subject to the ESG and Integrity (ESGI) evaluation. This ESGI report composes the Technical Note that is submitted to the competent authority to approve the investment.

FI 03	Mandatory	Public	Additional Assessed	PRI 1
-------	-----------	--------	---------------------	-------

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
